Dear colleagues,

On **March 26-28-th**

Will be held

The First International Scientific and Practical WEB-Forum

**"THE DEVELOPMENT OF THE UNIFIED OPEN INFORMATION SPACE IN LIFELONG EDUCATION"**

(registered at the UkrISTEI system of Ukrainian Ministry of Education and Science

Certificate № 535 from 12.11.2018)

Continuing the vigorous activity in the direction of modernizing the content of education by holding innovative scientific and practical events, we invite to assist in co-organization according to official consent the leading domestic and foreign scientific and educational institutions, which implement the experience of the competence and transdisciplinary paradigms of the development of society, have knowledge and experience in informatization and modernization of educational environments in creating conditions for receiving lifelong education, in introducing adaptive management of reforming of educational system, in forming and developing the intellectual and labor potential of countries, in developing giftedness and the talents of studying youth and ensuring the promotion of a talented person during lifetime, the creation of STEM educational instruments for training of the rising generation.

The project of the Forum defines the main fields of work, that according to the proposals of the organizers, can be changed and supplemented:

1. The transdisciplinary paradigm of the unified information educational space: the formation of the labor and intellectual potential of the country.
2. The realities and prospects for the development of the unified open informational space of education in cooperation with general educational, professional (vocational and technical), higher and extra-school educational institutions and scientific institutions.
3. Innovative transformations in economic education: continuity of professional training of specialists for the field of administration and management.
4. Adaptive management of social and pedagogical systems.
5. Adult education in the context of a sustainable development of the information society.
6. International experience of fundamental and applied research in the development of dual education in the context of the open unified informational educational space.
7. Scientific and practical foundations of e-education: tools, methodology, technology, environment.

The results of the formation of the scientific-programing and organizing committees of the Forum will be available since 01.03.2019 on the websites of institutions and educational establishments:
